Git clone

Git clone <https://github.com/alfonsoayalapaloma/dash-az.git>

Crear y activar un virtual env

```
cd ~  
python3 -m venv .venvs/dash  
source .venvs/dash/bin/activate
```

Instalar requisitos

```
cd dash-az  
pip install -r requirements.txt
```

Desplegar la app

az login

az webapp up -n <nombre único de la app>

```
(dash) alfonso@Azure:~/dash-az$ az webapp up -n dash-az36611
Webapp 'dash-az36611' already exists. The command will deploy contents to the existing app.
Creating AppServicePlan 'aayalap_asp_2707' ...
Creating zip with contents of dir /home/alfonso/dash-az ...
Getting scm site credentials for zip deployment
Starting zip deployment. This operation can take a while to complete ...
Deployment endpoint responded with status code 202
You can launch the app at http://dash-az36611.azurewebsites.net
Setting 'az webapp up' default arguments for current directory. Manage defaults with 'az configure --scope local'
